

KEY FEATURES AND BENEFIT FOR BOMBARDIER OUTLANDER 500

GEOMETRY IMPROVEMENTS:

- ✓ 8" wheel travel at the front
- ✓ 9" wheel travel at the rear
- ✓ Adjustable ride height (with preload)

AVAILABLE CONFIGURATIONS:

FRONT: Dual-rate spring upgrade kit
 REAR: Quadruple-rate spring set-up, remote reservoirs

ADJUSTMENT OPTIONS:

Available with the following options:

- ✓ Preload adjustment (ride height, tool provided)
- ✓ Compression and rebound adjustment (rear only)
- ✓ High- and low-speed compression (Elite Series)

HANDLING IMPROVEMENTS:

- ✓ More comfortable ride and greater stability
- ✓ Less body roll when cornering
- ✓ Reduces excessive weight transfer on acceleration and braking
- ✓ Increased wheel travel and bottoming protection
- ✓ Better traction and easier steering because all wheels stay on the ground
- ✓ More adjustment options to fine-tune to your personal riding style
- ✓ Specifically developed to restore the pure pleasure of riding

ELKA SUSPENSION BENEFITS:

- ✓ Custom-built for each rider's personal needs
- ✓ Handcrafted, high-quality products
- ✓ Quick production and delivery time
- ✓ Personalized customer service and after-sales support
- ✓ Accessible technicians to help you with set-up

STANDARD FEATURES OF ELKA SUSPENSION:

- ✓ Individually tested on a dynamometer to ensure quality and performance
- ✓ CNC-machined, aeronautical grade anodized billet aluminum parts and knobs
- ✓ Triple-seal heads and high-quality seals, o-rings and wearbands
- ✓ Checkball that isolates the compression adjustment from the rebound
- ✓ High-tensile proprietary springs
- ✓ Blow-off valve to prevent internal damage to the shocks from peak forces
- ✓ High-volume reservoirs with floating piston
- ✓ Wide range of highly effective adjustments
